

LCD, LED OR TRANSPARENT LED?

**The honest answer: it depends where
it's going.**

LCD

SHARP UPCLOSE

Menu boards, receptions, waiting rooms, in-store promotions. Detailed and cost-effective for most indoor uses.

LED

BIG AND BRIGHT

Shopping centre atriums, large venues, building fronts, outdoor sites. Modular panels, almost any size.

T-LED

SEE-THROUGH GLASS

Glass shopfronts. Content appears to float on the window while the store stays visible.

LOCATION FIRST. TECH SECOND.

Where is it going? Who is looking? From how far away? In what light?
