

Your pharmacy wall is working for free.

Where screens help most.

1

The window

Services and seasonal campaigns, visible from the street.

2

The entrance

What's new and how to book.

3

Above the shelves

Seasonal ranges: flu season, hay fever, sun care.

4

The counter

Services customers don't know you offer.

5

The waiting area

Something useful to watch makes the wait feel shorter.

Calm. Clear. Helpful.

A pharmacy screen should feel like good advice, not a hard sell. Change the message with the seasons, without reprinting a single poster.

Run a pharmacy? Let's talk.

I'll look at your space and tell you honestly where a screen would help, and where it wouldn't.
