

Martyn's Law: the countdown.

What venues need to know.

1

It's already law

Royal Assent April 2025, with a long implementation period.

2

Enforcement from at least April 2027

Time to prepare, but not to ignore it.

3

Tiered by capacity

Standard tier from 200 people, enhanced tier from 800.

Screens can support your procedures.

1

Standard tier needs no physical measures

It's about procedures and training. No one should sell you screens as "compliance".

2

But communication matters

Screens you already have can carry clear instructions to the public in an emergency.

3

Plan it with your procedures

Agree the messages in advance, so they're ready instantly.

Running a public venue?

Check the official Home Office and SIA guidance first. Then I can help you plan how your screens support it.
