

Screens can help keep shops safer.

Three places that matter.

1

The entrance

A public-view monitor tells every visitor, clearly and calmly, that the shop is monitored.

2

The till

Staff-respect messaging where tensions can rise, backing up your team.

3

The queue

Useful content keeps waiting customers calmer and better informed.

Part of the plan, not the plan.

Screens are one layer alongside staff training, CCTV, reporting and working with police. Used well, they make the message impossible to miss.

Want a safer store layout?

I'll look at your entrance, tills and queues and suggest where screens would genuinely help.
