

5 spots where a screen pays its way.

Where each screen does its **job.**

-
- 1 The window**
Stops people on the pavement. Bold offers, big prices.
 - 2 The entrance**
Sets the tone. Today's deals and what's new.
 - 3 Above the chiller**
Meal deals and drinks, right where people choose.
 - 4 At the till**
Add-ons, top-ups and loyalty, the last chance to sell.
 - 5 The queue**
Turns waiting time into browsing time.
-

The till is your **last chance to sell.**

A small screen facing the customer can promote the add-on they'd happily buy, while they're already reaching for their wallet.

Want us to map **your** store?

Send me your floor plan or a few photos. I'll mark where screens would earn their keep, and where they wouldn't.
